Who We Are

We at Experts Dimensions Training are a licensed and accredited training institution operating in both the Kingdom of Saudi Arabia and the United Arab Emirates. We provide in-person training programs (diplomas and short development programs), as well as live and recorded online training through the Zoom platform. Our advanced educational platform covers various specialties, supervised by a distinguished group of Arab and international trainers and experts. We excel in delivering high-quality programs in human development and professional fields, in addition to offering internationally accredited professional certificates from reputable global organizations. At Experts Dimensions Academy, we believe that training and development are not optional luxuries, but rather essential foundations for building a successful future and achieving true excellence. We strive to empower individuals and organizations by developing their skills and enhancing their expertise through high-quality training programs that keep pace with market needs, applying effective and impactful learning methods.

With expertise built on training over **20,000** trainees across diverse fields and delivering more than **100** training programs annually, we remain committed to cultivating excellence and building capable professionals — because their success is our mission.

Academy branches
(Dimensions Experts Training)

Officially accredited and licensed in the Kingdom of Saudi Arabia
by the Technical and Vocational Training Corporation (TVTC)
under License No. (224192355741812).

The institute also operates a licensed branch
in the United Arab Emirates, accredited by
the Knowledge and Human Development
Authority (KHDA) under the name "Dimensions Experts Training" with License No. (632664).

CEO's Message

The training and educational strategy at Experts Dimensions Academy focuses on five core pillars that collectively form the general framework guiding the Academy's operational training vision. These pillars are:

- **Deepening Knowledge and Application**

Strengthening essential knowledge across various specialties and connecting it with practical aspects in line with the latest changes in real-world environments, thereby achieving integrated knowledge for trainees.

- **Transferring Practical Expertise**

Transferring specialized practical experience extensively by engaging accomplished and successful practitioners in organizations.

- **Supporting Modern Management Foundations**

Directly supporting the foundations of modern business management by leveraging quantitative and analytical approaches to enhance decision-making.

- **Utilizing Modern Technology**

Expanding the use of computers and applying technological tools across various professional fields.

- **Field Training**

Hands-on field training and conducting practical research in natural work environments to support technical and applied aspects.

Our Vision

Experts Dimensions Academy strives to reach the best modern methods and tools that support the development of human resource performance. We believe that the human resource is the most important element in developing society, and its development must align with other productive resources that contribute to renewing and restructuring the community with a modern strategic outlook.

Our Mission

Based on our belief at Experts Dimensions Academy in the necessity of creating genuine development for both the private sector and the Arab world, and in supporting their capabilities to face future challenges—aligned with Saudi Vision 2030—we have found it essential to prepare and qualify human resources across various administrative and professional fields required by modern business establishments. In addition, we aim to enhance performance in both the private and public sectors through training and development. From this foundation, we feel a strong sense of responsibility toward achieving this mission

Training Programs and Courses

We offer training programs across various fields and specialties, including public courses and customized programs for organizations. These programs are delivered in collaboration with qualified trainers, whether from within the Kingdom of Saudi Arabia, the Arab world, or other international experts. We hold certifications licensed by the Technical and Vocational Training Corporation (TVTC) in Saudi Arabia, the Knowledge and Human Development Authority (KHDA) in the UAE, and the Arab League for Human Resources Development.

English Language Courses

Experts Dimensions Academy offers specialized English language training courses (including conversation and applied learning). These programs are delivered efficiently and effectively, taught by distinguished trainers. Our courses cover a wide range of high-quality curricula, delivered by certified trainers, offered to institutions, government entities, and others. We also hold licensed accreditation from the Ministry of Education.

Human Resources Solutions

We provide comprehensive HR solutions and programs, including job profiling, identifying manpower needs, and delivering supportive services for recruitment and talent management. Our aim is to assist organizations in developing and empowering employees in both the public and private sectors with high efficiency

Administrative Consultations

We excel in delivering consulting services with meticulous attention to detail for every client. This includes gathering and analyzing information, designing outputs, and providing the best solutions that can be applied effectively to help clients achieve their goals.

Training Programs in Self-Development and Human Development

At Dimensions Experts Training, we take pride in offering distinguished programs in the field of human development. These include self-development, motivation, emotional and behavioral skills, family counseling, personal and social skills, communication challenges, psychological and social support, conflict resolution, counseling techniques, and introducing programs aimed at guiding behavior, understanding human needs, and building healthy relationships. Additionally, we provide specialized training featuring a blend of theoretical and practical expertise, delivered with modern educational and professional methods that integrate contemporary pedagogical concepts

أكاديمية خبراء الأبعاد للتدريب

A young child with dark hair is shown from the chest up, holding a small globe of the Earth with both hands. The child is looking down at the globe. The background is a blurred indoor setting with other people. The entire image has a blue tint. There are two white circles of different sizes in the upper right quadrant and a thin vertical white line running down the center of the page.

Children's Development Programs

Experts Dimensions Academy offers specialized educational programs for children in the English language, as well as programs that develop learning skills and drawing. These programs aim to enhance children's cognitive, social, and linguistic abilities within an interactive and safe learning environment, supervised by qualified trainers experienced in working with young age groups

Corporate Qualification

The academy excels in qualifying organizations according to ISO standards, including ISO 9001, ISO 14001, and ISO 45001, as well as ISO 22000 and other international standards related to quality, environment, food safety, occupational health and safety, and information security. These certifications reflect the organization's commitment to delivering high-quality services and ensuring a safe working environment. We are ready to provide you with customized training content tailored to your academic and professional needs

You can request training programs across multiple fields according to your requirements—whether related to the topic, location, time, or number of participants. All you need to do is provide us with the necessary details, and we will prepare a program that aligns with your objectives.

Driven by our commitment to quality, we deliver our programs through accredited academic partnerships with reputable British and American institutions. We offer certified courses in the fields of safety and occupational health, quality, engineering, public administration, business administration, healthcare, and design.

Completed Projects

English Language Project

In cooperation with the Institute of Public Administration (Business Center), we supplied highly qualified consultants from Saudi Arabia and other nationalities. The project has been carried out for over a full year, in addition to providing specialized administrative consultations for developing curricula, policies, outputs, and organization to ensure alignment with the institute's administrative and educational system. The training impact was measured according to internationally approved standards from the Institute and the Ministry of Human Resources

Saudi Red Crescent Project

Implementing a professional development project in administrative, financial, and accounting systems, in addition to human development.

Ministry of Energy Project

In cooperation with the Electronic University, we implemented a development project in administrative, financial, accounting, human development systems

Consulting Services with the Ministry of Defense

Providing specialized administrative consulting services in strategic services, administrative organization and procedures, performance management, change management, beneficiary management, institutional transformation, and restructuring and training services

Consulting Services with Princess Nourah University

Providing specialized administrative consulting services in strategic services, administrative organization and procedures, performance management, change management, beneficiary management, institutional transformation, and human resources development services

Electronic Health Initiative Project

At Experts Dimensions, we are proud to complete the electronic health initiative project. Through this project, we provided essential administrative and technical support services to ensure project readiness, especially in strengthening telehealth services during the COVID-19 pandemic. We also contributed to facilitating communication between doctors and beneficiaries by offering training, consultations, and follow-up, which helped enhance service quality and implement digital transformation efficiently
